

Bear Viewing

3 Hours Whistler to Whistler

From USD\$162 per person

Consider this tour your opportunity to experience the wildlife, vegetation, glaciers, and rainforests of Whistler and Blackcomb Mountains. Visit bear dens and wander through pristine alpine meadows and old growth Western Hemlock forests. Learn how conservation and enhancement initiatives help to sustain healthy populations, and how mountain resorts are continually redesigning recreational experiences to ensure a sustainable future.

Whistler and Blackcomb Mountains are home to up to 60 black bears and cubs that have adapted to feeding, mating, and hibernating within ski area habitats. This is the only population of black bears in B.C. that has been studied for over two decades. Travel in a comfortable 4x4 vehicle through a maze of ski area roads that traverse the largest concentration of mother bear ranges in the region. Bear feeding patterns shift from valley bottom to higher mountain elevations as the summer continues, and the tours follow this progression allowing access these hidden scenic alpine ecosystems and natural habitats any time of the summer. Take an even closer look with short walks to bear feeding sites and bear family daybeds, and wander through old growth forests where bears have hibernated through many winters. Your experienced guide boasts a wealth of knowledge of Whistler's flora and fauna, ecology and bear biology for a truly incredible outdoor learning experience.
